

MOLD

KC Environmental Solutions can reduce future mold problems by eliminating the water source and fully remediating mold.

Our extensive process includes:

- Air quality assessment and evaluation including ERMI testing
- Making recommendations for safe, effective cleanup and removal
- Full removal of affected areas and repairs of mold-causing sources
- Trained in use Serum 1000 and Serum 2000, both environmentally safe and “green” products
- We are IAQA certified Mold Remediators and adhere to all EPA standards and OSHA guidelines, as well as IICRC (Institute of Inspection, Cleaning and Restoration Certification) S520 industry standards and New York City guidelines for professional mold remediation and complete removal of contamination

LEAD

We treat or remove lead-based paint hazards to make the property lead-safe for young children and other occupants.

Included in our list of services:

- Removal of lead paint and lead-contaminated dust
- Permanent enclosure or encapsulation of lead paint
- Replacement of lead-painted surfaces or fixtures
- Removal or covering of lead-contaminated soil
- Preparation, cleanup, disposal, and post-abatement clearance testing associated with these activities.
- We have a certified Lead Abatement Supervisor on staff

ASBESTOS

We are certified and experienced in all aspects of asbestos remediation.

Our expertise includes:

ASBESTOS ABATEMENT SITE EVALUATION

- Scope of work definition
- Asbestos containing materials identification
- Site requirements

ASBESTOS ABATEMENT CONTAINMENT AREA PREPARATION

- Area notification • Containment set up
- Utility isolation • Negative pressure

ASBESTOS ABATEMENT PROCEDURES

- Asbestos abatement • Decontamination
- Encasement and encapsulation

DOCUMENTATION, ACM HANDLING AND DISPOSAL

- Site documentation • ACM handling and disposal

ASBESTOS EMPLOYEE SAFETY PROCEDURES AND REGULATIONS

- Job site safety • Personal protections
- Employee record keeping

BIO-RECOVERY CLEAN UP

We are trained and equipped in removal and disposal of hazardous and bio-medical waste. Exposure to biological and chemical contaminants can pose serious health consequences for occupants, employees, and owners. A failure to properly and safely remove such substances can contribute to unhealthy and even dangerous environments. We approach all bio-recovery jobs safely, effectively and professionally:

- Decontamination procedures against dangerous pathogenic diseases
- Remove biohazardous substances
- Trauma and crime scene abatement
- Insurance liaison
- Equipped with the necessary safety equipment and cleaning products

ABOUT KC ENVIRONMENTAL, A KC BUILDING SOLUTIONS COMPANY

Since 1985 Don Derry has been a leader in the Kansas City structural repair industry. Started as KC Waterproofing, the company has expanded to three separate divisions: KC Waterproofing Solutions, KC Foundation Solutions and KC Environmental Solutions and are all part of KC Building Solutions family. These three distinct service areas allow us to specialize in structure specific solutions for new construction or repairs to existing structures. Whatever the structural challenge, we have a solution.

TRAINING AND CERTIFICATION

Our crew members receive the best training in the industry. In addition, team members have industry certifications that give another layer of expertise and security to our clients. Certifications include:

- Missouri Asbestos Inspector
- Certified NAWSRC Waterproofing Contractors
- Certified NAWSRC Structural Repair Contractor
- IICRC certified Water Damage Restoration Technicians
- Certified Asbestos Remediation Supervisors and Workers
- Certified Microbial Remediation Supervisor (IAQA)
- Certified Mold Inspectors
- Accredited Asbestos AHERA Inspector for Missouri and Kansas
- Certified Indoor Air Quality Inspectors
- Licensed Lead Abatement contractor – Missouri and Kansas
- Licensed contractor for asbestos removal in the states of Kansas and Missouri
- Lead Abatement Supervisors – Missouri and Kansas
- National Institute of Decontamination Specialists – Crime and Trauma Scene Bio-recovery Technician
